National Pension Fund
Actuarial Valuation and
Review as of January 1, 2018**

This report has been prepared at the request of the Board of Trustees to assist in administering the Fund and meeting filing requirements of federal government agencies. This valuation report may not otherwise be copied or reproduced in any form without the consent of the Board of Trustees and may only be provided to other parties in its entirety. The measurements shown in this actuarial valuation may not be applicable for other purposes.

Board of Trustees
Sheet Metal Workers' National Pension Fund
Fairfax, Virginia

Dear Trustees:

We are pleased to submit the Actuarial Valuation and Review as of January 1, 2018. It establishes the funding requirements for the current year and analyzes the preceding year's experience. It also summarizes the actuarial data and includes the actuarial information that is required to be filed with Form 5500 to federal government agencies.

The census information upon which our calculations were based was prepared by the Fund Office, under the direction of Ms. Debbie Elkins. That assistance is gratefully acknowledged. The actuarial calculations were completed under the supervision of Daniel V. Ciner, MAAA, Enrolled Actuary.

We look forward to reviewing this report with you at your next meeting and to answering any questions you may have.

Sincerely,

Segal Consulting, a Member of The Segal Group

Introduction

There are several ways of evaluating funding adequacy for a pension plan. In monitoring the Plan’s financial position, the Trustees should keep in mind all of these concepts.

	Funding Standard Account	The ERISA Funding Standard Account (FSA) measures the cumulative difference between actual contributions and the minimum required contributions. If actual contributions exceed the minimum required contributions, the excess is called the credit balance. If actual contributions fall short of the minimum required contributions, a funding deficiency occurs.
	Zone Information	The Pension Protection Act of 2006 (PPA'06) called on plan sponsors to actively monitor the projected FSA credit balance, the funded percentage (the ratio of the actuarial value of assets to the present value of benefits earned to date) and cash flow sufficiency. Based on these measures, plans are then categorized as critical (<i>Red Zone</i>), endangered (<i>Yellow Zone</i>), or neither (<i>Green Zone</i>). The Multiemployer Pension Reform Act of 2014 (MPRA), among other things, made the zone provisions permanent.
	Solvency Projections	Pension plan funding anticipates that, over the long term, both contributions and investment earnings will be needed to cover benefit payments and expenses. To the extent that contributions are less than benefit payments, investment earnings and fund assets will be needed to cover the shortfall. In some situations, a plan may be faced with insufficient assets to cover its current obligations and may need assistance from the Pension Benefit Guaranty Corporation (PBGC). MPRA provides options for some plans facing insolvency.
	Withdrawal Liability	ERISA provides for assessment of withdrawal liability to employers who withdraw from a multiemployer plan based on unfunded vested benefit liabilities. A separate report is available.

Important Information about Actuarial Valuations

An actuarial valuation is a budgeting tool with respect to the financing of future uncertain obligations of a pension plan. As such, it will never forecast the precise future contribution requirements or the precise future stream of benefit payments. In any event, it is an estimated forecast — the actual cost of the plan will be determined by the benefits and expenses paid, not by the actuarial valuation.

In order to prepare a valuation, Segal Consulting (“Segal”) relies on a number of input items. These include:

Plan Provisions

Plan provisions define the rules that will be used to determine benefit payments, and those rules, or the interpretation of them, may change over time. Even where they appear precise, outside factors may change how they operate. For example, a plan may require the award of a Social Security disability pension as a condition for receiving a disability pension from the plan. If so, changes in the Social Security law or administration may change the plan’s costs without any change in the terms of the plan itself. It is important for the Trustees to keep Segal informed with respect to plan provisions and administrative procedures, and to review the plan summary included in our report to confirm that Segal has correctly interpreted the plan of benefits.

Participant Information

An actuarial valuation for a plan is based on data provided to the actuary by the plan. Segal does not audit such data for completeness or accuracy, other than reviewing it for obvious inconsistencies compared to prior data and other information that appears unreasonable. For most plans, it is not possible nor desirable to take a snapshot of the actual workforce on the valuation date. It is not necessary to have perfect data for an actuarial valuation: the valuation is an estimated forecast, not a prediction. The uncertainties in other factors are such that even perfect data does not produce a “perfect” result. Notwithstanding the above, it is important for Segal to receive the best possible data and to be informed about any known incomplete or inaccurate data.

Financial Information

Part of the cost of a plan will be paid from existing assets – the balance will need to come from future contributions and investment income. The valuation is based on the asset values as of the valuation date, typically reported by the auditor. Some plans include assets, such as private equity holdings, real estate, or hedge funds, that are not subject to valuation by reference to transactions in the marketplace. A snapshot as of a single date may not be an appropriate value for determining a single year’s contribution requirement, especially in volatile markets. Plan sponsors often use an “actuarial value of assets” that differs from market value to gradually reflect year-to-year changes in the market value of assets in determining the contribution requirements.

Actuarial Assumptions

In preparing an actuarial valuation, Segal starts by developing a forecast of the benefits to be paid to existing plan participants for the rest of their lives and the lives of their beneficiaries. This requires actuarial assumptions as to the probability of death, disability, withdrawal, and retirement of participants in each year, as well as forecasts of the plan’s benefits for each of those events. The forecasted benefits are then discounted to a present value, typically based on an estimate of the rate of return that will be achieved on the plan’s assets. All of these factors are uncertain and unknowable. Thus, there will be a range of reasonable assumptions, and the results may vary materially based on which assumptions the actuary selects within that range. That is, there is no right answer (except with hindsight). It is important for any user of an actuarial valuation to understand and accept this constraint. The actuarial model may use approximations and estimates that will have an immaterial impact on our results and will have no impact on the actual cost of the plan (the total of benefits and expenses paid out over time). In addition, the actuarial assumptions may change over time, and while this can have a significant impact on the reported results, it does not mean that the previous assumptions or results were unreasonable or wrong.

Given the above, the user of Segal's actuarial valuation (or other actuarial calculations) needs to keep the following in mind:

- The actuarial valuation is prepared for use by the Trustees. It includes information for compliance with federal filing requirements and for the plan's auditor. Segal is not responsible for the use or misuse of its report, particularly by any other party.
- An actuarial valuation is a measurement at a specific date — it is not a prediction of a plan's future financial condition. Accordingly, Segal did not perform an analysis of the potential range of financial measurements, except where otherwise noted.
- Actuarial results in this report are not rounded, but that does not imply precision.
- Critical events for a plan include, but are not limited to, decisions about changes in benefits and contributions. The basis for such decisions needs to consider many factors such as the risk of changes in employment levels and investment losses, not just the current valuation results.
- ERISA requires a plan's enrolled actuary to provide a statement for inclusion in the plan's annual report disclosing any event or trend that the actuary has not taken into account, if, to the best of the actuary's knowledge, such an event or trend may require a material increase in plan costs or required contribution rates. If the Trustees are currently aware of any event that was not considered in this valuation and that may materially increase the cost of the Plan, they must advise Segal, so that we can evaluate it and take it into account.
- A certification of "zone" status under PPA'06 is a separate document from the actuarial valuation.
- Segal does not provide investment, legal, accounting, or tax advice. This valuation is based on Segal's understanding of applicable guidance in these areas and of the plan's provisions, but they may be subject to alternative interpretations. The Trustees should look to their other advisors for expertise in these areas.
- While Segal maintains extensive quality assurance procedures, an actuarial valuation involves complex computer models and numerous inputs. In the event that an inaccuracy is discovered after presentation of Segal's valuation, Segal may revise that valuation or make an appropriate adjustment in the next valuation.
- Segal's report shall be deemed to be final and accepted by the Trustees upon delivery and review. Trustees should notify Segal immediately of any questions or concerns about the final content.

As Segal Consulting has no discretionary authority with respect to the management or assets of the Plan, it is not a fiduciary in its capacity as actuaries and consultants with respect to the Plan.

Section 1: Actuarial Valuation Summary

Summary of Key Valuation Results

		2017	2018
Certified Zone Status		<i>Endangered</i>	<i>Endangered</i>
Demographic Data:	<ul style="list-style-type: none"> • Number of active participants • Number of inactive participants with vested rights • Number of alternate payees in deferred status • Number of retired participants and beneficiaries • Number of alternate payees in payment status 	57,295 33,149 533 47,652 1,121	58,840 33,089 557 47,843 1,161
Assets:	<ul style="list-style-type: none"> • Market value of assets (MVA) ¹ • Actuarial value of assets (AVA) • Unrecognized gain/(loss) • AVA as a percent of MVA 	\$4,314,445,996 4,538,327,898 (223,881,902) 105.2%	\$4,983,616,157 4,877,069,115 106,547,042 97.9%
Statutory Funding Information:	<ul style="list-style-type: none"> • Minimum required contribution² • Maximum deductible contribution • Expected employer contributions for coming Plan Year • Actual Contributions³ • Annual Funding Notice percentage • Funding Standard Account deficiency projected in Plan Year ending⁴ 	\$323,762,878 14,902,501,175 481,324,409 552,101,938 60.6% N/A	\$177,526,110 16,292,574,284 521,798,416 --- 63.0% N/A
Cost Elements on an FSA Cost Basis:	<ul style="list-style-type: none"> • Normal cost, including administrative expenses⁵ • Actuarial accrued liability • Unfunded actuarial accrued liability (based on AVA) 	\$156,390,652 7,494,271,997 \$2,955,944,099	\$92,111,005 7,737,632,788 \$2,860,563,673

¹Excludes receivable liability payments of \$15,895,957 for 2017 and \$17,833,411 for 2018

²Amount required to maintain a \$0 credit balance

³Includes withdrawal liability payments, liquidated damages, and adjustments for withdrawal liability receivable

⁴Recognizes the five-year amortization extension; contribution rate increases are based on current collective bargaining agreements only

⁵Reflects 1.00% Applicable Percentage under VBAR formula for 2017 and a 0.50% Applicable Percentage under VBAR formula for 2018

Comparison of Funded Percentages

	Funded Percentages as of January 1		2018	
	2017	2018	Liabilities	Assets
1. Present Value of Future Benefits	52.1%	55.4%	\$8,804,661,946	\$4,877,069,115
2. PPA'06 Liability and Annual Funding Notice	60.6%	63.0%	7,737,632,788	4,877,069,115
3. Accumulated Benefits Liability	57.6%	64.4%	7,737,632,788	4,983,616,157
4. Current Liability	32.1%	33.6%	14,839,783,736	4,983,616,157

Notes:

1. The value of benefits earned through the valuation date (accrued benefits) plus the value of benefits projected to be earned in the future for current participants. Used to develop the actuarial accrued liability, based on the long-term funding investment return assumption of 7.50% and the actuarial value of assets. The funded percentage using market value of assets is 49.5% for 2017 and 56.6% for 2018.
2. The present value of benefits earned through the valuation date (accrued benefits) defined by PPA'06, based on the long-term funding investment return assumption of 7.50% and compared to the actuarial value of assets.
3. The present value of accrued benefits for disclosure in the audited financial statements, based on the long-term funding investment return assumption of 7.50%, and compared to the market value of assets.
4. The present value of accrued benefits based on a government-prescribed mortality table and investment return assumption of 3.05% for 2017 and 2.98% for 2018, and compared to the market value of assets. Used to develop the maximum tax-deductible contribution and shown on the Schedule MB if less than 70%.

Disclosure: These measurements are not necessarily appropriate for assessing the sufficiency of Plan assets to cover the estimated cost of settling the Plan's benefit obligations or the need for or the amount of future contributions.

This January 1, 2018 actuarial valuation report is based on financial and demographic information as of that date. Changes subsequent to that date are not reflected unless specifically identified, and will affect future results. Segal is prepared to work with the Trustees to analyze the effects of any subsequent developments. The current year's actuarial valuation results follow.

A. Developments Since Last Valuation

1. The rate of return on the market value of plan assets was 14.11% for the 2017 plan year. The rate of return on the actuarial value of assets was 6.18%. Given the low fixed income interest rate environment, target asset allocation and expectations of future investment returns for various asset classes, we will continue to monitor the Plan's actual and anticipated investment returns relative to the assumed long-term rate of return on investments of 7.50%.
2. The actuarial value of assets (\$4.88 billion) is equal to 97.9% of market value (\$4.98 billion). Last year, the actuarial value of assets was 105.2% of market value. The 2008 investment loss has now been fully recognized in the actuarial value of assets.
3. Based on past experience and future expectations, the annual administrative expense assumption was changed from \$14.6 million to \$15.0 million, payable monthly.
4. Based on the 3-year average market value investment return of 4.59% for the Plan Years ended December 31, 2014-2016, the Applicable Percentage under the VBAR formula is 0.50% for the 2018 Plan Year. Based on the 3-year average market value investment return of 7.26% for the Plan Years ended December 31, 2015-2017, the Applicable Percentage under the VBAR formula will be 0.75% for the 2019 Plan Year. Details of the VBAR formula are provided in Section 4, Exhibit 9.
5. Contribution rates increase in accordance with the Alternative Options of the Funding Improvement Plan. Since benefit accruals are tied to contribution rates, increases in contribution rates are recognized as plan amendments. The average contribution rate increased from \$5.09 per hour as of January 1, 2017 to \$5.37 per hour as of January 1, 2018.
6. Based on the census data used for this valuation (as of December 31, 2017), 68.0% of active participants were covered under the First Alternative Option (34.6% covered under 55/30 contracts), 27.4% were covered under the Default Option, 0.3% were covered under the benefit structure applicable to groups that did not continue bargaining increases under the Alternative Options and 4.3% were covered under the Second Alternative Option (0.3% covered under 60/30 contracts).
7. The 2018 certification, issued on March 30, 2018, was based on the liabilities calculated in the 2017 actuarial valuation, projected to December 31, 2017 and estimated asset information as of December 31, 2017. The Plan was classified as endangered (in the Yellow Zone) because the funded percentage was less than 80% and the credit balance in the FSA was projected to be positive for at least seven years. In addition, the Plan was certified to be making the scheduled progress in meeting the requirements of its Funding Improvement Plan. It was not projected to be in critical status for any of the succeeding five Plan Years. This projection was based on the Trustees' industry activity assumption that the active population will remain at the December 31, 2013 level of 54,282 active participants and, on average, contributions will be made for 1,650 hours per year for each active participant.

B. Funded Percentage and Funding Standard Account

1. Based on this January 1, 2018 actuarial valuation, the funded percentage that will be reported on the 2018 Annual Funding Notice is 63.0%.
2. The funded percentage based on the market value of assets is 64.4%, an increase of 6.8% from 57.6% as of the prior year.
3. The credit balance in the FSA as of December 31, 2017 was \$249.0 million, an increase of \$34.7 million from the prior year value of \$214.3 million.
4. A 10-year projection of the Funding Standard Account based on this 2018 valuation, assuming the Plan will experience a market rate of return of 7.50% each year into the future, administrative expenses increase by 3.0% per year, all other experience emerges as projected, and with no plan amendments or changes to laws/regulations or other actuarial assumptions, indicates that credit balance (recognizing the five-year amortization extension) will remain positive. If the five-year amortization extension is not considered, the Plan is projected to have a funding deficiency for the next five years. These projections are based on the Trustees' industry activity assumption (54,282 active participants and 1,650 hours per year for each active participant) and reported bargained contribution rate increases. They also reflect the Applicable Percentage under the VBAR formula of 0.50% for 2018, 0.75% for 2019, and the average expected long-term Applicable Percentage of 0.86% for 2020 and later. The average expected long-term Applicable Percentage was developed based on stochastic projections as described in Section 4, Exhibit 8.

C. Solvency Projections

1. Based on this valuation, the current value of assets plus future investment earnings and contribution income is projected to exceed benefit payments and administrative expenses for at least 15 years, assuming experience is consistent with January 1, 2018 assumptions and there are no future changes in the Plan provisions, law/regulations, or actuarial assumptions. The projected assets are shown on page 30. If requested by the Trustees, we can perform additional projections of the financial status of the Plan.

D. Risk

1. The actuarial valuation results are dependent on a single set of assumptions; however, there is a risk that emerging results may differ significantly as actual experience proves to be different from the current assumptions. We have included a discussion of various risks that may affect the Plan in *Section 2*, beginning on page 33.
2. We have separately performed a detailed analysis of the potential range of future measurements, based on a range of possible investment returns, including a discussion of risks that may affect the Plan.

E. Withdrawal Liability

1. The actuarial present value of vested Plan benefits for withdrawal liability purposes is not the same figure as determined for FASB ASC 960 purposes because the two calculations involve different actuarial assumptions. A separate detailed report on withdrawal liability is available.

Section 2: Actuarial Valuation Results

Participant Information

- The Actuarial Valuation is based on demographic data as of December 31, 2017.
- The number of active participants has declined from its peak of 70,448 as of December 31, 2008 to its lowest level of 54,282 as of December 31, 2013 and increased to 58,840 since then. The number in pay status has increased steadily over the past ten years.
- The ratio of non-actives to actives has decreased to 1.38 from 1.41 in the prior year.
- More details on the historical information are included in *Section 3, Exhibits A and B*.

POPULATION AS OF
DECEMBER 31

RATIO OF NON-ACTIVES TO ACTIVES
AS OF DECEMBER 31

Active Participants

- There were 58,840 active participants this year, an increase of 2.7% compared to 57,295 in the prior year.
- There were 477 active participants with unknown age compared to 610 in the prior year. The actuarial calculations were adjusted for missing information by assuming that it was the same as information provided for other active participants with similar known characteristics.
- The age and service distribution is included in *Section 4, Exhibit 6*.

Distribution of Active Participants as of December 31, 2017

BY AGE

Average age	43.0
Prior year average age	<u>42.9</u>
Difference	0.1

BY PENSION CREDITS

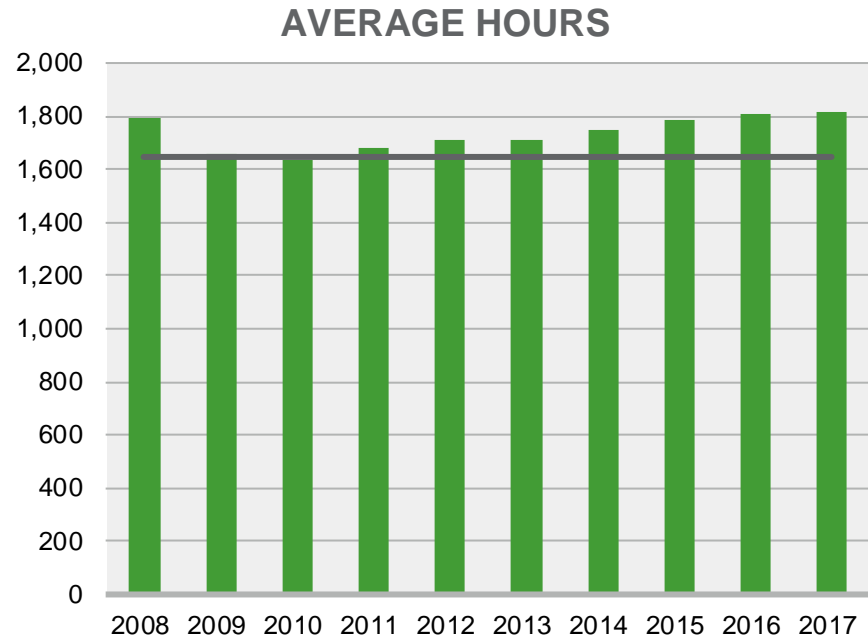

Average pension credits	13.4
Prior year average pension credits	<u>13.6</u>
Difference	-0.2

Historical Employment

- The charts below show a history of hours worked over the last ten years. Additional detail is in *Section 3, Exhibit C*.
- The 2018 zone certification was based on an industry activity assumption of the number of active participants would remain at the December 31, 2013 level of 54,282 actives for all future years and, on the average, contributions will be made for each active for 1,650 hours each year (approximately 90 million hours). Recent average hours have been increasing.

Historical Average Total Hours	
Last year	106,936,425
Last five years	99,631,701
Last 10 years	100,642,680
PPA assumption	89,565,300

Historical Average Hours	
Last year	1,817
Last five years	1,774
Last 10 years	1,734
Long-term assumption	1,650

Note: The total hours of contributions are based on total hours reported in the census data. Lines in charts represent PPA assumption for industry activity following respective year

Inactive Vested Participants

- A participant who is not currently active and has satisfied the requirements for, but has not yet commenced, a pension is considered an “inactive vested” participant. There were 32,984 inactive vested participants this year, a decrease of 0.1% compared to 33,027 last year.
- There were 36 inactive vested with unknown age compared to 34 in the prior year. The actuarial calculations were adjusted for missing information by assuming that it was the same as information provided for other active participants with similar known characteristics.
- In addition, there were 105 beneficiaries and 557 alternate payees eligible for deferred benefits in this valuation as compared to 122 beneficiaries and 533 alternate payees in the prior year. These participants are excluded from the charts shown below.

Distribution of Inactive Vested Participants as of December 31, 2017

BY AGE

Average age 52.2

Prior year average age 51.6

Difference 0.6

BY MONTHLY AMOUNT

Average amount \$461

Prior year average amount \$457

Difference \$4

*Unsubsidized Early pensions not separately identified prior to 2015.

Pay Status Information

- There were 38,949 pensioners, 8,839 beneficiaries and 1,161 alternate payees this year, compared to 38,952, 8,666, and 1,121 respectively, in the prior year. In addition, there are 47 suspended pensioners and 8 suspended beneficiaries compared to 34 and 0 in the prior year.
- Monthly benefits for the Plan Year ending December 31, 2017 total \$39,674,079¹, as compared to \$39,551,388¹ in the prior year.

Distribution of Pensioners as of December 31, 2017

**BY TYPE
AND AGE**

Average age	72.4
Prior year average age	<u>72.2</u>
Difference	0.2

**BY TYPE AND
MONTHLY AMOUNT**

Average amount	\$918
Prior year average amount	<u>\$919</u>
Difference	-\$1

¹ Includes one-twelfth of annual COLA payments

Financial Information

- Benefits and expenses are funded solely from contributions and investment earnings.
- Additional detail is in *Section 3, Exhibit E*.
- For the most recent year, contributions (\$552.1 million) exceeded benefit payments (\$482.6 million) plus expenses (\$14.9 million).
- Contributions (including withdrawal liability payments) have exceeded benefits paid and administrative expenses in the last two years, primarily due to the higher active population (8% increase since 2013) and contribution rate increases required under the Rehabilitation/Funding Improvement Plan (23% increase in average rate since the end of 2013). Benefit payments have steadily increased over the last ten years.

COMPARISON OF EMPLOYER CONTRIBUTIONS WITH BENEFITS AND EXPENSES PAID

Determination of Actuarial Value of Assets

- The asset valuation method gradually recognizes annual market value fluctuations to help mitigate volatility in the actuarial cost calculations.
- The investment loss for year ended December 31, 2008 has been fully recognized.
- Less volatility in the actuarial cost better aligns with negotiated contribution rates.

1	Market value of assets, December 31, 2017			\$4,983,616,157
2	Calculation of unrecognized return	Original Amount*	Unrecognized Return**	
	(a) Year ended December 31, 2017	\$287,044,734	\$229,635,787	
	(b) Year ended December 31, 2016	23,047,095	13,828,257	
	(c) Year ended December 31, 2015	-316,167,649	-126,467,060	
	(d) Year ended December 31, 2014	-52,249,711	-10,449,942

	(g) Total unrecognized return			\$106,547,042
3	Preliminary actuarial value: (1) - (2g)			4,877,069,115
4	Adjustment to be within 20% corridor			0
5	Final actuarial value of assets as of December 31, 2017: (3) + (4)			4,877,069,115
6	Actuarial value as a percentage of market value: (5) ÷ (1)			97.9%
7	Amount deferred for future recognition: (1) - (5)			\$106,547,042

* Total return minus expected return on a market value basis

** Recognition at 10% per year over 10 years for year ended December 31, 2008, and 20% per year over 5 years for remaining years

Asset History for Years Ended December 31

- Both the actuarial value and the market value of assets are representations of the Plan's financial status.
- The actuarial value is significant because it is subtracted from the Plan's total actuarial accrued liability to determine the portion that is not funded and is used to determine the PPA'06 funded percentage.
- Amortization of the unfunded accrued liability is an important element in the contribution requirements of the Plan.

ACTUARIAL VALUE OF ASSETS VS. MARKET VALUE OF ASSETS

Actuarial Experience

- Assumptions should reflect experience and should be based on reasonable expectations for the future.
- Each year actual experience is compared to that projected by the assumptions. Differences are reflected in the contribution requirement as an experience gain or loss.
- Assumptions are not changed if experience is believed to be a short-term development and that, over the long run, experience will return to assumed levels.
- The net experience variation for the year, other than investment experience, was 0.5% of the projected actuarial accrued liability from the prior valuation, and was not significant when compared to that liability.

EXPERIENCE FOR THE YEAR ENDED DECEMBER 31, 2017

1	Loss from investments	<u>-\$60,175,352</u>
2	Loss from administrative expenses	<u>-262,547</u>
3	Net loss from other experience	<u>-34,921,894</u>
4	Net experience loss: 1 + 2 + 3	<u>-\$95,359,793</u>

Actuarial Value Investment Experience

- Net investment income consists of expected investment income at the actuarially assumed rate of return, and an adjustment for market value changes. Investment expenses are subtracted.
- The actuarial value of assets does not yet fully recognize past investment gains and losses, which will affect future actuarial investment returns.
- The market value rate of return was 14.11% for the year ended December 31, 2017. The actuarial value rate of return was 6.18%.

INVESTMENT EXPERIENCE FOR THE YEAR ENDED DECEMBER 31, 2017

1	Net investment income	\$282,315,215
2	Average actuarial value of assets	4,566,540,899
3	Rate of return: $1 \div 2$	6.18%
4	Assumed rate of return	7.50%
5	Expected net investment income: 2×4	\$342,490,567
6	Actuarial loss from investments: $1 - 5$	<u>-\$60,175,352</u>

Historical Investment Returns

- Actuarial planning is long term. The obligations of a pension plan are expected to continue for the lifetime of all its participants.
- The assumed long-term rate of return of 7.50% considers past experience, the Trustees’ asset allocation policy and future expectations.

MARKET VALUE AND ACTUARIAL RATES OF RETURN FOR YEARS ENDED DECEMBER 31

Average Rates of Return	Actuarial Value	Market Value
Most recent year return:	6.18%	14.11%
Most recent three-year average return:	5.12%	7.26%
Most recent five-year average return:	5.90%	9.36%
Most recent ten-year average return:	5.54%	6.42%
20-year average return:	6.10%	6.70%

Note: The average return for the most recent three years is the arithmetic average of the returns. For average returns over five or more years, the average return is weighted by the asset value.

The actuarial value investment returns for 1999, 2006 and 2008 include the effect of a change in the method for determining the actuarial value of assets.

Non-Investment Experience

Administrative Expenses

- Administrative expenses for the year ended December 31, 2017 totaled \$14,853,932, as compared to the assumption of \$14,600,000.

Mortality Experience

- Mortality experience (more or fewer than expected deaths) yields actuarial gains or losses.
- The average number of deaths for nondisabled pensioners over the past three years was 1,358 per year compared to 1,305 projected deaths per year. The average number of deaths for disabled pensioners over the past three years was 197 per year compared to 219 projected deaths per year.

Other Experience

- Other differences between projected and actual experience include the extent of turnover among the participants, and retirement experience (earlier or later than projected), and the number of disability retirements.

Actuarial Assumptions

- The following actuarial assumption change is recognized in this valuation:
 - Administrative expenses were increased from \$14,600,000 to \$15,000,000 for the year beginning January 1, 2018.
- Details on actuarial assumptions and methods are in *Section 4, Exhibit 8*.

Plan Provisions

- Based on the 3-year average market value investment return of 4.59% for the Plan Years ended December 31, 2014-2016, the Applicable Percentage under the VBAR formula is 0.50% for the 2018 Plan Year. Based on the 3-year average market value investment return of 7.26% for the Plan Years ended December 31, 2015-2017, the Applicable Percentage under the VBAR formula will be 0.75% for the 2019 Plan Year.

Contribution Rate Changes

- Contribution rates increase in accordance with the Alternative Options of the Funding Improvement Plan. Since benefit accruals are tied to contribution rates, increases in contribution rates are recognized as plan amendments. The average contribution rate increased from \$5.09 per hour as of January 1, 2017 to \$5.37 per hour as of January 1, 2018.
- A summary of plan provisions is in *Section 4, Exhibit 9*.

Pension Protection Act of 2006

2018 Actuarial Status Certification

- PPA'06 requires trustees to actively monitor their plans' financial prospects to identify emerging funding challenges so they can be addressed effectively. Details are shown in *Section 3, Exhibit K*.
- The 2018 certification, completed on March 30, 2018, was based on the liabilities calculated in the January 1, 2017 actuarial valuation, projected to December 31, 2017, and estimated asset information as of December 31, 2017. The Trustees provided an industry activity assumption that the number of active participants will remain level at the December 31, 2013 level of 54,282 and, on the average, contribution will be made for each active for 1,650 hours each year.
- This Plan was classified as endangered (in the *Yellow Zone*) because the projected funded percentage was less than 80% and the credit balance in the FSA was projected to be positive for at least seven years.

Year	Zone Status
2008	RED
2009	RED
2010	RED
2011	RED
2012	RED
2013	RED
2014	YELLOW
2015	YELLOW
2016	YELLOW
2017	YELLOW
2018	YELLOW

Funding Improvement Plan Update

- The Plan's Funding Improvement Period is the 10-year period beginning January 1, 2017. The Plan is making the scheduled progress in meeting the requirements of its Funding Improvement Plan.
- Segal will continue to assist the Trustees in evaluating and, if necessary, updating the Funding Improvement Plan.

Funding Standard Account (FSA)

- On December 31, 2017, the FSA had a credit balance of \$249,042,884, as shown on the 2017 Schedule MB. Contributions meet the legal requirement on a cumulative basis if that account shows no deficiency.
- The minimum funding requirement for the year beginning January 1, 2018 is \$177,526,110.
- Based on the assumption that 58,840 participants will work an average of 1,650 hours at a \$5.3746 average contribution rate, the contributions projected for the year beginning January 1, 2018 are \$521,798,416. The credit balance is projected to increase by approximately \$114,796,863 to \$363,839,747 as of December 31, 2018.
- A summary of the ERISA minimum funding requirements and the FSA for the year ended December 31, 2017 is included in *Section 3, Exhibit I*.

Funding Standard Account Projection

- A 10-year projection indicates the credit balance will remain positive, assuming that:
 - The Plan will earn a market rate of return equal to 7.50% each year,
 - The long-term applicable percentage under the VBAR is 0.86% for 2020 and after,
 - No contribution increases other than those already in effect (i.e., disregarding remaining contribution rate increases under the Funding Improvement Plan),
 - All other experience emerges as assumed, no assumption changes are made (other than a 3% per year increase in administrative expenses), and
 - There are no plan amendments or changes in law/regulation.
- The projection is based on a level number of active employees (at 54,282) and 1,650 hours per capita.

CREDIT BALANCE AS OF DECEMBER 31

Additional scenarios would demonstrate sensitivity to investment return, employment and other alternative assumptions.

PPA'06 Funded Percentage Historical Information

PRESENT VALUE OF ACCRUED BENEFITS (PVAB) VS. ACTUARIAL VALUE OF ASSETS AS OF JANUARY 1

PPA '06 FUNDED PERCENTAGE AS OF JANUARY 1

Solvency Projection

- PPA'06 requires Trustees to monitor plan solvency - the ability to pay benefits and expenses when due. The Multiemployer Pension Reform Act of 2014 further classifies plans that are projected to become insolvent with 15 or 20 years as “critical and declining.” See Section 3, Exhibit K for more information.
- Projections using the current actuarial valuation assumptions show the Plan is not expected to be insolvent within 15 years, based on the negotiated contribution rates, the current plan of benefits and the Trustees’ industry activity assumption. This projection also reflects the Applicable Percentage under the VBAR formula of 0.50% for 2018, 0.75% for 2019, and the average expected long-term Applicable Percentage of 0.86% for 2020 and later.

PROJECTED ASSETS AS OF DECEMBER 31

Additional scenarios would demonstrate sensitivity to investment return, employment and other alternative assumptions.

Risk

- The actuarial valuation results are dependent on a single set of assumptions; however, there is a risk that emerging results may differ significantly as actual experience proves to be different from the current assumptions.
- There are many ways of illustrating how the deviation in actual experience from the assumptions could affect the cost of the Plan, such as scenario testing and stress testing. This is addressed in a separate report titled: “Identifying Pension Plan Risks and Stochastic Investment Return Analysis.”

Examples of key plan risks include the following:

- Investment Risk (the risk that returns will be different than expected)
- Employment Risk (the risk that actual contributions will be different from projected contributions)
- Longevity Risk (the risk that mortality experience will be different than expected)
- Other Demographic Risk (the risk that participant experience will be different than assumed)

Examples of this risk include:

- Actual retirements occurring earlier or later than assumed.
 - More or less active participant turnover than assumed.
 - Return to covered employment of previously inactive participants.
- Maturity Measures

The risk associated with a pension plan increases as it becomes more mature, meaning that the actives represent a smaller portion of the liabilities of the plan. When this happens, there is a greater risk that fluctuations in the experience of the non-active participants or of the assets of the plan can result in large swings in the contribution requirements.

Withdrawal Liability

- A separate withdrawal liability report is available.

Section 3: Supplementary Information

EXHIBIT A - TABLE OF PLAN COVERAGE

Category	Year Ended December 31		Change from Prior Year
	2016	2017

					Total	\$3,967,054,338		\$4,010,004,523	
			Most recent three-year average return:				5.12%		7.26%
			Most recent five-year average return:				5.90%		9.36%
			Most recent ten-year average return:				5.54%		6.42%
			20-year average return:				6.10%		6.70%

Note: The average return for the most recent three years is the arithmetic average of the returns. For average returns over five or more years, the average return is weighted by the asset value.

¹ The actuarial value investment returns for 1999, 2006 and 2008 include the effect of a change in the method for determining the actuarial value of assets.

**EXHIBIT H - ANNUAL FUNDING NOTICE FOR PLAN YEAR BEGINNING
JANUARY 1, 2018 AND ENDING DECEMBER 31, 2018**

	2018 Plan Year	2017 Plan Year	2016 Plan Year
Actuarial valuation date	January 1, 2018	January 1, 2017	January 1, 2016
Funded percentage	63.0%	60.6%	59.4%
Value of assets	\$4,877,069,115	\$4,538,327,898	\$4,294,266,345
Value of liabilities	7,737,632,788	7,494,271,997	7,230,768,938
Fair market value of assets as of plan year end*	Not available	4,983,616,157	4,314,445,996

*Excludes withdrawal liability payments receivable

Critical or Endangered Status

The Plan is in endangered status for the 2018 Plan year because it is not in critical status and its funded percentage is less than 80%. In addition, the Plan is not projected to be in critical status for any of the five succeeding Plan years.

EXHIBIT I - FUNDING STANDARD ACCOUNT

- ERISA imposes a minimum funding standard that requires the Plan to maintain an FSA. The accumulation of contributions in excess of the minimum required contributions is called the FSA credit balance. If actual contributions fall short on a cumulative basis, a funding deficiency has occurred. For a plan that is in critical status under PPA '06, employers will generally not be penalized if a funding deficiency develops, provided the parties fulfill their obligations in accordance with the Rehabilitation Plan developed by the Trustees and the negotiated bargaining agreements reflect that Rehabilitation Plan.
- The FSA is charged with the normal cost and the amortization of increases or decreases in the unfunded actuarial accrued liability due to plan amendments, experience gains or losses, and changes in actuarial assumptions and funding methods. The FSA is credited with employer contributions. All items, including the prior credit balance or deficiency, are adjusted with interest at the actuarially assumed rate.
- Increases or decreases in the unfunded actuarial accrued liability are amortized over 15 years except that short-term benefits, such as 13th checks, are amortized over the scheduled payout period.

FSA FOR THE YEAR ENDED DECEMBER 31, 2017 (RECOGNIZING FIVE-YEAR AMORTIZATION EXTENSION)

Charges		Credits			
1	Prior year funding deficiency	\$0	6	Prior year credit balance	\$214,313,331
2	Normal cost, including administrative expenses	156,390,652	7	Employer contributions	552,101,938
3	Total amortization charges	610,308,993	8	Total amortization credits	251,211,544
4	Interest to end of the year	<u>57,502,473</u>	9	Interest to end of the year	55,618,189
5	<i>Total charges</i>	<u>\$824,202,118</u>	10	Full-funding limitation credit	<u>0</u>
			11	<i>Total credits</i>	<u>\$1,073,245,002</u>
			Credit balance: 11 - 5		<u>\$249,042,884</u>

EXHIBIT I - FUNDING STANDARD ACCOUNT (CONTINUED)

- PPA '06 requires the Internal Revenue Service (IRS) to permit multiemployer plans facing a funding deficiency within 10 years to extend the schedule for paying off their liabilities by five years. The Trustees elected to utilize this provision effective January 1, 2009.
- The chart below shows the development of the Funding Standard Account without the five-year amortization extension.

FUNDING STANDARD ACCOUNT FOR THE YEAR ENDED DECEMBER 31, 2017 (DISREGARDING FIVE-YEAR AMORTIZATION EXTENSION)

Charges		Credits			
1	Prior year funding deficiency	\$641,325,488	6	Prior year credit balance	\$0
2	Normal cost, including administrative expenses	156,390,652	7	Employer contributions	552,101,938
3	Total amortization charges	552,413,799	8	Total amortization credits	251,211,544
4	Interest to end of the year	102,25,745	9	Interest to end of the year	39,544,689
5	<i>Total charges</i>	<i>\$1,451,389,684</i>	10	Full-funding limitation credit	0
			11	<i>Total credits</i>	<i>\$842,858,171</i>
			Credit balance/(funding deficiency): 11 - 5		<u>-\$608,531,513</u>

EXHIBIT J - MAXIMUM DEDUCTIBLE CONTRIBUTION

- Employers that contribute to defined benefit pension plans are allowed a current deduction for payments to such plans. There are various measures of a plan’s funded level that are considered in the development of the maximum deductible contribution amount.
- One of the limits is the excess of 140% of “current liability” over assets. “Current liability” is one measure of the actuarial present value of all benefits earned by the participants as of the valuation date. This limit is significantly higher than the current contribution level.
- Contributions in excess of the maximum deductible amount are not prohibited; only the deductibility of these contributions is subject to challenge and may have to be deferred to a later year. In addition, if contributions are not fully deductible, an excise tax in an amount equal to 10% of the non-deductible contributions may be imposed. However, the plan sponsor may elect to exempt the non-deductible amount up to the ERISA full-funding limitation from the excise tax.
- The Trustees should review the interpretation and applicability of all laws and regulations concerning any issues as to the deductibility of contribution amounts with Fund Counsel.

1	Normal cost, including administrative expenses	\$92,111,005
2	Amortization of unfunded actuarial accrued liability	387,668,718
3	Preliminary maximum deductible contribution: 1 + 2, with interest to the end of the plan year	\$515,763,202
4	Full-funding limitation (FFL)	8,795,151,415
5	Preliminary maximum deductible contribution, adjusted for FFL: <i>lesser of 3 and 4</i>	515,763,202
6	Current liability projected to the end of the plan year	14,994,845,738
7	Actuarial value of assets, projected to the end of the plan year	4,700,209,749
8	Excess of 140% of current liability over projected assets at end of plan year: [140% of (6)] - (7) , not less than zero	16,292,574,284
9	End of year minimum required contribution	177,526,110
Maximum deductible contribution: <i>greatest of 5, 8, and 9</i>		\$16,292,574,284

EXHIBIT K - PENSION PROTECTION ACT OF 2006

PPA'06 Zone Status

- Based on projections of the credit balance in the FSA, the funded percentage, and cash flow sufficiency tests, plans are categorized in one of three “zones”: critical status, endangered status, or neither.
- The funded percentage is determined using the actuarial value of assets and the present value of benefits earned to date, based on the actuary’s best estimate assumptions.

Critical Status (Red Zone)

A plan is classified as being in critical status (the *Red Zone*) if:

- The funded percentage is less than 65%, and either there is a projected FSA deficiency within five years or the plan is projected to be unable to pay benefits within seven years, or
- There is a projected FSA deficiency within four years, or
- There is a projected inability to pay benefits within five years, or
- The present value of vested benefits for inactive participants exceeds that for actives, contributions are less than the value of the current year’s benefit accruals plus interest on existing unfunded accrued benefit liabilities, and there is a projected FSA deficiency within five years, or
- As permitted by the Multiemployer Pension Reform Act of 2014, the plan is projected to be in the *Red Zone* within the next five years and the plan sponsor elects to be in critical status.

A critical status plan is further classified as being in critical and declining status if:

- The ratio of inactives to actives is at least 2 to 1, and there is an inability to pay benefits projected within 20 years, or
- The funded percentage is less than 80%, and there is an inability to pay benefits projected within 20 years, or
- There is an inability to pay benefits projected within 15 years.

Any amortization extensions are ignored for testing initial entry into the *Red Zone*.

The Trustees are required to adopt a formal Rehabilitation Plan, designed to allow the plan to emerge from critical status by the end of the rehabilitation period. If they determine that such emergence is not reasonable, the Rehabilitation Plan must be designed to emerge as of a later time or to forestall possible insolvency.

Trustees of *Red Zone* plans have tools, such as the ability to reduce or eliminate early retirement subsidies, to remedy the situation. Accelerated forms of benefit payment (such as lump sums) are prohibited. However, unless the plan is critical and declining, Trustees may not reduce benefits of participants who retired before being notified of the plan’s critical status (other than rolling back recent benefit increases) or alter core retirement benefits payable at normal retirement age.

Endangered Status (Yellow Zone)

A plan not in critical status (*Red Zone*) is classified as being in endangered status (the *Yellow Zone*) if:

- The funded percentage is less than 80%, or
- There is a projected FSA deficiency within seven years.

A plan that has both of the endangered conditions present is classified as seriously endangered.

Trustees of a plan that was in the *Green Zone* in the prior year can elect not to enter the *Yellow Zone* in the current year (although otherwise required to do so) if the plan's current provisions would be sufficient (with no further action) to allow the plan to emerge from the *Yellow Zone* within 10 years.

The Trustees are required to adopt a formal Funding Improvement Plan, designed to improve the current funded percentage, and avoid a funding deficiency as of the emergence date.

Green Zone

A plan not in critical status (the *Red Zone*) nor in endangered status (the *Yellow Zone*) is classified as being in the *Green Zone*.

Early Election of Critical Status

Trustees of a *Green* or *Yellow Zone* plan that is projected to enter the *Red Zone* within the next five years must elect whether or not to enter the *Red Zone* for the current year.

Section 4: Certificate of Actuarial Valuation

OCTOBER 12, 2018

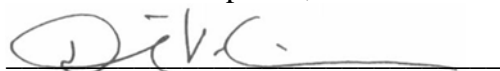

CERTIFICATE OF ACTUARIAL VALUATION

This is to certify that Segal Consulting, a Member of The Segal Group, Inc. (“Segal”) has prepared an actuarial valuation of the Sheet Metal Workers' National Pension Fund as of January 1, 2018 in accordance with generally accepted actuarial principles and practices. It has been prepared at the request of the Board of Trustees to assist in administering the Fund and meeting filing requirements of federal government agencies. This valuation report may not otherwise be copied or reproduced in any form without the consent of the Board of Trustees and may only be provided to other parties in its entirety.

The measurements shown in this actuarial valuation may not be applicable for other purposes. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law.

The valuation is based on the assumption that the Plan is qualified as a multiemployer plan for the year and on draft information supplied by the auditor with respect to contributions and assets and reliance on the Plan Administrator with respect to the participant data. Segal Consulting does not audit the data provided. The accuracy and comprehensiveness of the data is the responsibility of those supplying the data. To the extent we can, however, Segal does review the data for reasonableness and consistency. Based on our review of the data, we have no reason to doubt the substantial accuracy of the information on which we have based this report and we have no reason to believe there are facts or circumstances that would affect the validity of these results. Adjustments for incomplete or apparently inconsistent data were made as described in the attached *Exhibit 8*.

I am a member of the American Academy of Actuaries and I meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein. To the best of my knowledge, the information supplied in this actuarial valuation is complete and accurate, except as noted in *Exhibit 1*. Each prescribed assumption for the determination of Current Liability was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Daniel V. Ciner, MAAA
Senior Vice President and Actuary
Enrolled Actuary No. 17-05773

EXHIBIT 1 - SUMMARY OF ACTUARIAL VALUATION RESULTS

The valuation was made with respect to the following data supplied to us by the Plan Administrator:

Pensioners as of the valuation date (including 8,839 beneficiaries in pay status, 47 pensioners in suspended status, and 8 beneficiaries in suspended status)		47,843
Participants inactive during year ended December 31, 2017 with vested rights (including 105 beneficiaries with rights to deferred pensions and 36 participants with unknown age)		33,089
Participants active during the year ended December 31, 2017 (including 477 participants with unknown age)		58,840
• Fully vested	43,925	
• Not vested	14,915	
Total participants		139,772

The actuarial factors as of the valuation date are as follows:

Normal cost, including administrative expenses		\$92,111,005
Actuarial accrued liability		7,737,632,788
• Pensioners and beneficiaries ¹	\$4,294,941,651	
• Inactive participants with vested rights ²	890,318,247	
• Active participants	2,552,372,890	
Actuarial value of assets (\$4,983,616,157 ³ at market value as reported by Calibre CPA Group)		\$4,877,069,115
Unfunded actuarial accrued liability		2,860,563,673

¹Includes liabilities for 1,161 alternate payees in pay status who are excluded from the above counts

²Includes liabilities for 557 alternate payees with deferred benefits who are excluded from the above counts

³Excludes receivable withdrawal liability payments of \$17,833,411

EXHIBIT 2 - ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

The actuarial present value of accumulated plan benefits calculated in accordance with FASB ASC 960 is shown below as of January 1, 2017 and as of January 1, 2018. In addition, the factors that affected the change between the two dates follow.

	Benefit Information Date	
	January 1, 2017	January 1, 2018
Actuarial present value of vested accumulated plan benefits:		
• Participants currently receiving payments	\$4,209,867,923	\$4,294,941,651
• Other vested benefits	<u>2,922,483,657</u>	<u>3,071,909,902</u>
• Total vested benefits	\$7,132,351,580	\$7,366,851,553
Actuarial present value of non-vested accumulated plan benefits	361,920,417	370,781,235
Total actuarial present value of accumulated plan benefits	\$7,494,271,997	\$7,737,632,788

Factors	Change in Actuarial Present Value of Accumulated Plan Benefits
Plan amendments*	-\$7,750,216
Benefits accumulated, net experience gain or loss, changes in data	189,721,047
Benefits paid	-482,583,556
Interest	543,973,516
Total	\$243,360,791

*Net impact of changes in individual participants' contribution rate and/or Funding Improvement Plan option.

EXHIBIT 3 - CURRENT LIABILITY

The table below presents the current liability for the Plan Year beginning January 1, 2018.

Item ¹	Amount
Retired participants and beneficiaries receiving payments	\$6,463,359,802
Inactive vested participants	2,151,847,501
Active participants	
• Non-vested benefits	\$954,031,470
• Vested benefits	<u>5,270,544,963</u>
• <i>Total active</i>	\$6,224,576,433
Total	\$14,839,783,736
Expected increase in current liability due to benefits accruing during the plan year	\$221,872,739
Expected release from current liability for the plan year	508,077,742
Expected plan disbursements for the plan year, including administrative expenses of \$15,000,000	523,077,742
Current value of assets	\$4,983,616,157
Percentage funded for Schedule MB	33.6%

¹ The actuarial assumptions used to calculate these values are shown in Exhibit 8.

EXHIBIT 4 - INFORMATION ON PLAN STATUS AS OF JANUARY 1, 2018

Plan status (as certified on March 30, 2018, for the 2018 zone certification)	<i>Endangered</i>
Scheduled progress (as certified on March 30, 2018, for the 2018 zone certification)	Yes
Actuarial value of assets for FSA	\$4,877,069,115
Accrued liability under unit credit cost method	7,737,632,788
Funded percentage for monitoring plan's status	63.0%

EXHIBIT 5 - SCHEDULE OF PROJECTION OF EXPECTED BENEFIT PAYMENTS
 (SCHEDULE MB, LINE 8b(1))

Plan Year	Expected Annual Benefit Payments ¹
2018	\$507,253,281
2019	523,384,091
2020	539,730,698
2021	555,740,672
2022	571,265,056
2023	585,643,656
2024	598,747,246
2025	610,780,640
2026	620,983,730
2027	629,943,156

¹ Assuming as of the valuation date:

- no additional accruals,
- experience is in line with valuation assumptions, and
- no new entrants are covered by the plan.

EXHIBIT 6 - SCHEDULE OF ACTIVE PARTICIPANT DATA

(SCHEDULE MB, LINE 8b(2))

The participant data is for the year ended December 31, 2017.

Age	Pension Credits									
	Total	0 - 4	5 - 9	10 - 14	15 - 19	20 - 24	25 - 29	30 - 34	35 - 39	40 & over
Under 25	3,261	3,104	157	–	–	–	–	–	–	–
25 - 29	5,658	3,657	1,833	168	–	–	–	–	–	–
30 - 34	7,009	2,682	2,417	1,842	68	–	–	–	–	–
35 - 39	7,930	1,868	1,942	2,373	1,665	82	–	–	–	–
40 - 44	7,750	1,202	1,244	1,809	2,240	1,228	27	–	–	–
45 - 49	8,110	844	877	1,288	1,933	1,931	1,183	54	–	–
50 - 54	8,527	537	601	972	1,468	1,529	2,098	1,270	52	–
55 - 59	6,833	369	421	665	935	950	1,217	1,396	835	45
60 - 64	2,817	136	193	296	401	384	375	365	458	209
65 - 69	419	22	34	55	62	60	40	29	46	71
70 & over	49	8	4	6	6	7	5	3	1	9
Unknown	477	448	27	2	–	–	–	–	–	–
Total	58,840	14,877	9,750	9,476	8,778	6,171	4,945	3,117	1,392	334

Note: Excludes 2,750 participants with less than one year of vesting service.

EXHIBIT 7 - FUNDING STANDARD ACCOUNT

The table below presents the FSA for the Plan Year ending December 31, 2018.

Charges		Credits			
1	Prior year funding deficiency	\$0	6	Prior year credit balance	\$249,042,884
2	Normal cost, including administrative expenses	92,111,005	7	Amortization credits	252,028,288
3	Amortization charges	574,100,734	8	Interest on 6 and 7	37,580,338
4	Interest on 1, 2 and 3	49,965,881	9	Full-funding limitation credit	0
5	Total charges	\$716,177,620	10	Total credits	\$538,651,510
Minimum contribution with interest required to avoid a funding deficiency: 5 - 10, not less than zero					\$177,526,110

Full Funding Limitation (FFL) and Credits	
ERISA FFL (accrued liability FFL)	\$3,441,846,379
RPA'94 override (90% current liability FFL)	8,795,151,415
FFL credit	0

Schedule MB, line 8e

Difference between minimum required contribution for the year and the minimum that would have been required without extending the amortization bases is \$555,057,552.

EXHIBIT 7 - FUNDING STANDARD ACCOUNT (CONTINUED)

Schedule of FSA Bases (Charges) (Schedule MB, Line 9c)

EXHIBIT 8 - STATEMENT OF ACTUARIAL ASSUMPTIONS/METHODS

(SCHEDULE MB, LINE 6)

Mortality Rates

Healthy Employee: RP-2014 Blue Collar Employee Mortality Tables (sex distinct), with ages set forward 1 year, projected generationally using Scale MP-2014

Healthy Pensioner or Beneficiary: RP-2014 Blue Collar Healthy Annuitant Mortality Tables (sex distinct), with ages set forward 1 year, projected generationally using Scale MP-2014

Disabled: RP-2014 Disabled Retiree Mortality Tables (sex distinct), with ages set forward 1 year, projected generationally using Scale MP-2014

The mortality tables with ages set forward 1 year and projected with Scale MP-2014 from 2014 reasonably reflect the mortality experience of the Plan as of the measurement date. These mortality tables were then adjusted to future years using the generational projection to reflect future mortality improvement between the measurement date and those years.

The mortality rates were based on historical and current demographic data, adjusted to reflect estimated future experience and professional judgment. As part of the analysis, a comparison was made between the actual number of deaths by age and liability change and the projected number and liability change based on the prior year's assumption over the most recent three years.

**Termination Rates

55	0.38	0.20	0.64	3.00	7.40
60	0.65	0.28	1.30	0.00	7.40

¹Mortality rates are projected on a generational basis using Scale MP-2014. Rates above are sample rates in 2018.

²Participants are assumed to elect non-disability pensions upon eligibility.

³Withdrawal rates do not apply at or beyond early retirement age.

The termination rates and disability rates were based on historical and current demographic data, adjusted to reflect estimated future experience and professional judgment. As part of the analysis, a comparison was made between the actual number of terminations and disability retirements and the projected number based on the prior years' assumption over the most recent five years.

Retirement Rates

Age	Annual Retirement Rates	
	Not Eligible for 55/30 (60/30) Pension	Eligible for 55/30 (60/30) Pension*
55	5	25
56-57	5	14
58-59	7	14
60-61	14	20
62	35	40
63-69	25	35
70	100	100

*Rate at first eligibility for 55/30 (60/30, if applicable) Pension is 25% or above rate at applicable age, if higher

The retirement rates were based on historical and current demographic data, adjusted to reflect estimated future experience and professional judgment. As part of the analysis, a comparison was made between the actual number of retirements by age and liability change and the projected number and liability change based on the prior years' assumption over the most recent five years.

Description of Weighted Average Retirement Age

Age 62, determined as follows: The weighted average retirement age for each participant is calculated as the sum of the product of each potential current or future retirement age times the probability of surviving from current age to that age and then retiring at that age, assuming no other decrements. The overall weighted retirement age is the average of the individual retirement ages based on all the active participants included in the January 1, 2018 actuarial valuation.

Retirement Rates for Inactive Vested Participants

Age	Annual Retirement Rates*
55-61	5
62-63	10
64	30
65	35
66-79	20
80	100

*20% of inactive participants are assumed to retire with a Special Early, or 55/30 Pension (60/30 if applicable) if expected to be eligible based on reported Funding Improvement Plan Option, and 80% are assumed to retire with a Normal or Standard Early Pension, depending upon age and service at retirement.

The retirement rates for inactive vested participants were based on historical and current demographic data, adjusted to reflect estimated future experience and professional judgment. As part of the analysis, a comparison was made between the actual number retirements by age and the projected number based on the prior years' assumption over the most recent five years.

Future Benefit Accruals

For Construction employees: 1,650 hours per year
 For Production employees: 1,700 hours per year

The Funding Improvement Plan Option covering each participant, based on the census data provided for this valuation, is assumed to remain unchanged.

The Applicable Percentage under the Plan's benefit formula is 0.50% for 2018 and 0.75% for 2019. For 2020 and beyond, the average expected Applicable Percentage is 0.86%.

The assumed hours used to calculate future benefit accruals were based on historical and current demographic data, adjusted to reflect estimated future experience and professional judgment. As part of the analysis, a comparison was made between the assumed and the actual benefit accruals over the most recent five years.

The average expected Applicable Percentage was determined by stochastically projecting the Plan's market investment returns after 2017. The stochastic projections were based on the long-term expected returns and volatility estimates as provided by the Plan's Investment Manager in 2018, as well as the Plan's target asset allocation.

Unknown Data for Participants

Same as those exhibited by participants with similar known characteristics. If not specified, participants are assumed to be male.

Definition of Active Participants	Employees with at least 435 hours in the most recent plan year and who have accumulated at least one year of vesting service, excluding those who have retired as of the valuation date.
Percent Married	80%
Age and Sex of Spouse	Spouse of male participant is assumed to be three years younger than the participant and spouse of female participant is assumed to be three years older than the participant. If the spouse's sex is not provided, the spouse is assumed to be the opposite sex of the participant.
Benefit Election	Married participants are assumed to elect the 50% joint and survivor annuity (with the "pop-up" feature if available) and non-married participants are assumed to elect the single life annuity. The benefit elections were based on historical and current demographic data, adjusted to reflect the plan design, and estimated future experience and professional judgment.
Delayed Retirement Factors	Inactive vested participants after attaining age 65, with increases up to age 80.
Net Investment Return	7.50% The net investment return assumption is a long-term estimate derived from historical data, current and recent market expectations, and professional judgment. As part of the analysis, based on the Plan's target asset allocation, a building block approach was used that reflects inflation expectations and anticipated risk premiums for each of the portfolio's asset classes as provided by Segal Marco Advisors, and stochastic modeling was performed based on the long-term expected returns and volatility estimates as provided by the Plan's Investment Manager in 2018.
Annual Administrative Expenses	\$15,000,000 for the year beginning January 1, 2018 (equivalent to \$14,426,877 payable at the beginning of the year) The annual administrative expenses were based on historical and current data, estimated future experience and professional judgment.
Actuarial Value of Assets	The market value of assets less unrecognized returns in prior years. Unrecognized return is equal to the difference between the actual market return and the projected market return, and is recognized 20% per year over a five-year period (10% per year over a 10-year period for the year ended December 31, 2008). The actuarial value is further adjusted, if necessary, to be within 20% of the market value.
Actuarial Cost Method	Unit Credit Actuarial Cost Method. Normal Cost and Actuarial Accrued Liability are calculated on an individual basis.
Benefits Valued	Unless otherwise indicated, includes all benefits summarized in <i>Exhibit 9</i> .
Current Liability Assumptions	<i>Interest</i> : 2.98%, within the permissible range prescribed under IRC Section 431(c)(6)(E) <i>Mortality</i> : Mortality prescribed under IRS Regulations 1.431(c)(6)-1 and 1.430(h)(3)-1(a)(2): RP-2014 employee and annuitant mortality tables, adjusted backward to the base year (2006) using scale MP-2014, projected forward generationally using scale MP-2016

Estimated Rate of Investment Return	<i>On actuarial value of assets (Schedule MB, line 6g): 6.2%, for the Plan Year ending December 31, 2017</i> <i>On current (market) value of assets (Schedule MB, line 6h): 14.1%, for the Plan Year ending December 31, 2017</i>
FSA Contribution Timing (Schedule MB, line 3a)	Unless otherwise noted, contributions are paid periodically throughout the year pursuant to collective bargaining agreements. The interest credited in the FSA is therefore assumed to be equivalent to a June 30 contribution date.

**Justification for
Change in Actuarial
Assumptions
(Schedule MB, line 11)**

For purposes of determining current liability, the mortality tables were changed in accordance with IRS Regulations 1.431(c)(6)-1 and 1.430(h)(3)-1 and reflect generational adjustment.

Based on past experience and future expectations, the following actuarial assumption was changed as of January 1, 2018 for funding purposes:

Annual administrative expenses, previously \$14,600,000, payable monthly.

As this change has no effect on the unfunded actuarial accrued liability, no amortization based was established.

EXHIBIT 9 - SUMMARY OF PLAN PROVISIONS
(SCHEDULE MB, LINE 6)

This exhibit summarizes the major provisions of the Plan included in the valuation. It is not intended to be, nor should it be interpreted as, a complete statement of all plan provisions.

Plan Year	January 1 through December 31
Pension Credit Year	January 1 through December 31
Plan Status	Ongoing plan
Regular Pension	<ul style="list-style-type: none"> • <i>Age Requirement:</i> 65 • <i>Service Requirement:</i> Five years of participation in the Plan • <i>Amount:</i> Described below <p>For service on and after January 1, 2014:</p> <p>Participant's <i>Benefit Rate</i> multiplied by the participant's <i>Contribution Hours</i> for the Plan Year multiplied by the <i>Applicable Percentage</i> for the Plan Year.</p> <p><i>Benefit Rate</i> is the portion of the participant's contribution rate that is subject to benefit accruals. For Participants working under a Collective Bargaining Agreement that qualifies for a 55/30 (or 60/30) Pension, the <i>Benefit Rate</i> is the total Contribution Rate less the 55/30 (or 60/30) Rate (30% of the Contribution Rate for periods after December 1, 2007).</p> <p><i>Contribution Hours</i> are the hours for which contributions are required to be made for the participant's work in Covered Employment.</p> <p><i>Applicable Percentage</i> is based on the average of the Plan's rate of market value investment return for each of the three most recent Plan Years reported in the Actuarial Valuation and Review as of January 1 of the immediately preceding Plan Year and is defined in the following table:</p>

Applicable Percentage	Average of Market Value Investment Return Percentages for 3 Most Recent Plan Years
1.25%	10.0% or higher
1.00%	8.5% or higher but less than 10.0%
0.75%	6.5% or higher but less than 8.5%
0.50%	Greater than 0% but less than 6.5%
0.00%	0% or less

The above formula applies unless otherwise stated in a Funding Improvement Plan Option.

The Applicable Percentage for the 2018 Plan Year is 0.50%.

For service and on and after adoption of Rehabilitation Plan Schedule and before January 1, 2014:

Default Schedule/Persons for Whom Contribution were Not Required to be Made ("Persons for Whom"): 1% of the amount determined by multiplying the participant's Benefit Rate by the participant's Contribution Hours for the Plan Year.

First Alternative Schedule: Same as accrual for service on and after December 1, 2007 and before adoption of Rehabilitation Plan Schedule.

Second Alternative Schedule: 1% of the amount determined by multiplying the participant's Benefit Rate by the participant's Contribution Hours for the Plan Year.

Formerly Alternative Schedule and Agreement Did Not Include Required Contribution Rate Increases - No Increase Consequences ("NIC"): 1% of the amount determined by multiplying the participant's Benefit Rate by the participant's Contribution Hours for the Plan Year.

For service on and after December 1, 2007 and before adoption of Rehabilitation Plan Schedule:

Employers that have not made required contribution rate increases: Same as accrual for service after August 31, 2003.

Employers that have made required contribution rate increases: 1.5% of the amount determined by multiplying the participant's Benefit Rate by the participant's Contribution Hours for the Plan Year (up to 1,200 hours), plus 0.7% of the amount determined by multiplying the participant's Benefit Rate by the participant's Contribution Hours (over 1,200 hours). The 1.5% multiplier is applied to the first 1,200 hours at the highest Benefit Rate in effect during the Plan Year.

For service after August 31, 2003 and before December 1, 2007:

0.8571% of the amount determined by multiplying the participant's Benefit Rate by the participant's Contribution Hours (up to 1,400 hours), plus 0.3% of the amount determined by multiplying the participant's Benefit Rate by the participant's Contribution Hours (over 1,400 hours). For participants in 55/30 Locals, 80% of the total contribution rate is subject to benefit accruals. The 0.8571% multiplier is applied to the first 1,400 hours at the highest Benefit Rate in effect during the Plan Year.

Supplemental accruals:

Locals are required to increase their contribution rates subject to benefit accruals by 10% annually for eligibility. Participants of Locals that make the required increases earn a supplemental accrual that brings the total accrual to twice the normal rate in the year following the increase.

For service after December 31, 1999 and before September 1, 2003:

1.7142% of the amount determined by multiplying the participant's Benefit Rate by the participant's Contribution Hours (up to 1,400 hours), plus 0.6% of the amount determined by multiplying the participant's Benefit Rate by the participant's Contribution Hours (over 1,400 hours). The 1.7142% multiplier is applied to the first 1,400 hours at the highest Benefit Rate in effect during the Plan Year.

For service before January 1, 2000:

Benefit accrued according to the rules of the Plan in effect on December 31, 1999

Past Service:

\$10.00 for each year of Past Service Credit, if any, up to 10 years

- *Post-Normal Retirement Age Adjustment:* Regular pension accrued at Normal Retirement Age (NRA), increased by 1.0% for each month greater than NRA, and 1.5% for each month greater than age 70.

Standard Early Retirement

- *Age Requirement:* 55
- *Service Requirement:* Fulfill any one of the following:
 - a. 10 years of Pension Credits, including at least five years of Future Service Credit, or
 - b. 10 years of Vesting Service, or
 - c. 15 years of Pension Credits, including at least 12 months of Future Service Credit
- *Amount:* Normal Retirement benefit reduced as described below.

For benefits accrued on and after January 1, 2014:

Reductions based on the participant's Funding Improvement Plan Option, which depends upon the Schedule or Rehabilitation Plan provision which applied to the classification of employment when the Plan was in critical status.

<i>Default Option</i>	Actuarially from age 65 (Unsubsidized Early Retirement Pension)
<i>First Alternative Option</i>	6% per year from age 65
<i>Second Alternative Option</i>	Actuarially from age 65 (Unsubsidized Early Retirement Pension)

For benefits accrued before January 1, 2014:

Reductions based on the participant's Home Local Schedule (Rehabilitation Plan Schedule) when the Plan was in critical status.

<i>Default Schedule/ Persons for Whom</i>	Actuarially from age 65 (Unsubsidized Early Retirement Pension)
<i>First Alternative Schedule</i>	6% per year from age 65
<i>Second Alternative Schedule</i>	Actuarially from age 65 (Unsubsidized Early Retirement Pension)
<i>NIC</i>	Actuarially from age 65 (Unsubsidized Early Retirement Pension)

Special Early Retirement

- *Age Requirement:* 55
- *Service Requirement:* Fulfill any one of the following:
 - a. 10 years of Pension Credits, including at least five years of Future Service Credit, or
 - b. 10 years of Vesting Service, or
 - c. 15 years of Pension Credits, including at least 12 months of Future Service Credit
- *Active Service Requirement:* Complete at least 3,500 hours of work in covered employment during the five consecutive calendar years immediately preceding retirement
- *Amount:* Normal Retirement benefit reduced as described below.

For benefits accrued on and after January 1, 2014:

Reductions based on the participant's Funding Improvement Plan Option, which depends upon the Schedule or Rehabilitation Plan provision which applied to the classification of employment when the Plan was in critical status.

<i>Default Option</i>	Unavailable
<i>First Alternative Option</i>	6% per year from age 62
<i>Second Alternative Option</i>	Unavailable

For benefits accrued before January 1, 2014:

Reductions based on the participant's Home Local Schedule (Rehabilitation Plan Schedule) when the Plan was in critical status.

<i>Default Schedule/ Persons for Whom</i>	Unavailable
<i>First Alternative Schedule</i>	6% per year from age 62
<i>Second Alternative Schedule</i>	Unavailable
<i>NIC</i>	Unavailable

Age 62 Pension

- *Age Requirement:* 62
- *Service Requirement:* Same as Special Early Retirement
- *Active Service Requirement:* Same as Special Early Retirement
- *Amount:* Described below

For benefits accrued on and after January 1, 2014:

Amount based on the participant’s Funding Improvement Plan Option, which depends upon the Schedule or Rehabilitation Plan provision which applied to the classification of employment when the Plan was in critical status.

<i>Default Option</i>	Unavailable
<i>First Alternative Option</i>	Unavailable
<i>Second Alternative Option</i>	Normal Retirement Benefit amount

For benefits accrued before January 1, 2014:

Amount based on the participant’s Home Local Schedule (Rehabilitation Plan Schedule) when the Plan was in critical status.

<i>Default Schedule/ Persons for Whom</i>	Unavailable
<i>First Alternative Schedule</i>	Unavailable
<i>Second Alternative Schedule</i>	Normal Retirement Benefit amount
<i>NIC</i>	Normal Retirement Benefit amount

55/30 Pension

- *Age Requirement:* 55
- *Service Requirement:* 30 years of Future Service Credit with at least 60 months of the last 120 months of Future Service Credit subject to a 55/30 Rate
- *Active Service Requirement:* Complete at least 3,500 hours of work in covered employment at 55/30 Rate during the five consecutive calendar years immediately preceding retirement
- *Amount:* Described below

For benefits accrued on and after January 1, 2014:

Amount based on the participant’s Funding Improvement Plan Option, which depends upon the Schedule or Rehabilitation Plan provision which applied to the classification of employment when the Plan was in critical status.

<i>Default Option</i>	Unavailable
<i>First Alternative Option</i>	Normal Retirement benefit amount

	<p><i>Second Alternative Option</i> Unavailable</p> <p>For benefits accrued before January 1, 2014:</p> <p>Amount based on the participant’s Home Local Schedule (Rehabilitation Plan Schedule) when the Plan was in critical status.</p> <p><i>Default Schedule/ Persons for Whom</i> Unavailable</p> <p><i>First Alternative Schedule</i> Normal Retirement Benefit amount</p> <p><i>Second Alternative Schedule</i> Unavailable</p> <p><i>NIC</i> Unavailable</p>
60/30 Pension	<ul style="list-style-type: none"> • <i>Age Requirement:</i> 60 • <i>Service Requirement:</i> Same as 55/30 Pension • <i>Active Service Requirement:</i> Same as 55/30 Pension • <i>Amount:</i> Described below <p>For benefits accrued on and after January 1, 2014:</p> <p>Amount based on the participant’s Funding Improvement Plan Option, which depends upon the Schedule or Rehabilitation Plan provision which applied to the classification of employment when the Plan was in critical status.</p> <p><i>Default Option</i> Unavailable</p> <p><i>First Alternative Option</i> Unavailable</p> <p><i>Second Alternative Option</i> Normal Retirement benefit amount</p> <p>For benefits accrued before January 1, 2014:</p> <p>Amount based on the participant’s Home Local Schedule (Rehabilitation Plan Schedule) when the Plan was in critical status.</p> <p><i>Default Schedule/ Persons for Whom</i> Unavailable</p> <p><i>First Alternative Schedule</i> Unavailable</p> <p><i>Second Alternative Schedule</i> Normal Retirement benefit amount</p> <p><i>NIC</i> Unavailable</p>
Full Disability	<ul style="list-style-type: none"> • <i>Age Requirement:</i> Under age 55 • <i>Service Requirement:</i> 10 years of Credited Service, including at least five years of Future Service Credit

	<ul style="list-style-type: none"> • Active Service Requirement: Worked at least 435 hours in the 24-month period immediately preceding the date of disablement • <i>Other Requirement:</i> Approved for disability benefit with the Social Security Administration or Railroad Retirement Board • <i>Amount:</i> Early Retirement benefit amount, payable beginning in the seventh month of disability • Charge for Coverage: None <p><i>The Disability Benefit is not payable for participants categorized as Persons for Whom when the Plan was in critical status unless all eligibility conditions had been satisfied before January 1, 2010.</i></p>
Vesting	<ul style="list-style-type: none"> • <i>Age Requirement:</i> None • <i>Service Requirement:</i> Five years of Vesting Service • <i>Amount:</i> Normal Retirement benefit amount, based on plan in effect when last active • <i>Normal Retirement Age:</i> 65
Spouse's Pre-Retirement Death Benefit	<ul style="list-style-type: none"> • <i>Eligibility Requirement:</i> Has attained Vested Status • <i>Amount:</i> 50% of the monthly benefit the participant would have received had he/she terminated employment on his/her date of death and survived to his/her Early Retirement Date (or any later date elected by the spouse), retired and elected to receive benefits in the Normal Form of payment. • <i>When Paid:</i> Immediately if participant's death occurred after attainment of his/her earliest retirement age, otherwise month in which the participant would have attained his/her earliest retirement age. If surviving spouse elects to receive payments before the month in which participant would have attained his/her earliest retirement age, the monthly benefit will be the actuarial equivalent of the amount described above.
Pre-Retirement Lump-sum Death Benefit	<ul style="list-style-type: none"> • <i>Eligibility:</i> Date of death after December 31, 2007; has attained Vested Status; no portion of the benefit assigned to an Alternative Payee under a QDRO; and worked at least 435 hours within 24-month period preceding death • <i>Amount:</i> \$5,000
Post-Retirement Death Benefit	<p><i>50% Joint and Survivor:</i> If married, pension benefits are paid in the form of a 50% joint and survivor annuity unless the participant and spouse reject this form. If not rejected, the benefit amount otherwise payable is reduced to reflect the joint and survivor coverage. If not rejected, the spouse predeceases the employee, and the employee retired on March 1, 1999 or later, the employee's benefit amount will subsequently be increased to the unreduced amount payable ("pop-up" feature) had the joint and survivor coverage been rejected. If rejected, or if not married, benefits are payable for the life of the employee, or in any other available optional form elected by the employee in an actuarially equivalent amount.</p> <p>The "pop-up" feature is only applicable to pre-2014 benefits if the participant's Home Local Schedule/Rehabilitation Plan Schedule as of December 31, 2013 was the First Alternative Schedule or Second Alternative Schedule. It is only</p>

	<p>applicable to post-2013 benefits attributable to Contribution Hours worked under a collective bargaining agreement satisfying the required contribution rate increases under the Rehabilitation Plan First Alternative Schedule/Funding Improvement Plan First Alternative Option or Rehabilitation Plan Second Alternative Schedule/Funding Improvement Plan Second Alternative Option.</p> <p><i>60-Month Certain:</i> If the member has completed at least 15 years of Pension Credits before retirement and died within 5 years after retirement (if married, and taking joint and survivor pension, the spouse also died prior to receiving an amount equal to 60 times the amount of the pension the participant had been entitled), the pension benefit will continue to be paid to the participant’s designated beneficiary until a total of 60 months payments had been made.</p> <p>The 60-month certain is only applicable to pre-2014 benefits if the participant’s Home Local Schedule/Rehabilitation Plan Schedule as of December 31, 2013 was the First Alternative Schedule or Second Alternative Schedule. It is only applicable to post-2013 benefits attributable to Contribution Hours worked under a collective bargaining agreement satisfying the required contribution rate increases under the Rehabilitation Plan First Alternative Schedule/Funding Improvement Plan First Alternative Option or Rehabilitation Plan Second Alternative Schedule/Funding Improvement Plan Second Alternative Option.</p>
<p>Forms of Payment</p>	<p>The normal forms of payment are:</p> <ul style="list-style-type: none"> • Single life annuity for single participants, and • 50% joint and survivor annuity with a “pop-up” feature for married participants (if applicable) <p>The available optional forms of payment are:</p> <ul style="list-style-type: none"> • Single life annuity with 60-month certain (if applicable) • 50% joint and survivor annuity with a “pop-up” feature and 60-month certain (if applicable) • 75% joint and survivor annuity with a “pop-up” feature (if applicable) • 100% joint and survivor annuity with and without a “pop-up” feature (if applicable) <p>The “pop-up” feature and 60-month certain are only applicable to pre-2014 benefits if the participant’s Home Local Schedule/Rehabilitation Plan Schedule as of December 31, 2013 was the First Alternative Schedule or Second Alternative Schedule. They are only applicable to post-2013 benefits attributable to Contribution Hours worked under a collective bargaining agreement satisfying the required contribution rate increases under the Rehabilitation Plan First Alternative Schedule/Funding Improvement Plan First Alternative Option or Rehabilitation Plan Second Alternative Schedule/Funding Improvement Plan Second Alternative Option.</p>
<p>Participation</p>	<p>After completion of 870 hours during a calendar year</p>
<p>Past Service Credit</p>	<p>Service granted on the basis of days worked or amount earned in covered employment in calendar years prior to a participant’s Contribution Date. For employers with a Contribution Date on or after January 1, 2000, the employer’s initial contribution rate must be at least \$0.50 per hour.</p>

<p>Future Service Credit</p>	<p>Service granted on the basis of hours of work in a calendar year after a Participant's Contribution Date in accordance with the following schedule:</p> <table border="1" data-bbox="558 228 1465 821"> <thead> <tr> <th data-bbox="558 228 989 305">Months of Future Service Credit</th> <th data-bbox="999 228 1465 305">Hours of Work in Covered Employment During Calendar Year</th> </tr> </thead> <tbody> <tr> <td data-bbox="558 313 989 342">0</td> <td data-bbox="999 313 1465 342">Less than 100</td> </tr> <tr> <td data-bbox="558 350 989 380">1</td> <td data-bbox="999 350 1465 380">100 - 199</td> </tr> <tr> <td data-bbox="558 388 989 417">2</td> <td data-bbox="999 388 1465 417">200 - 299</td> </tr> <tr> <td data-bbox="558 425 989 454">3</td> <td data-bbox="999 425 1465 454">300 - 399</td> </tr> <tr> <td data-bbox="558 462 989 492">4</td> <td data-bbox="999 462 1465 492">400 - 499</td> </tr> <tr> <td data-bbox="558 500 989 529">5</td> <td data-bbox="999 500 1465 529">500 - 599</td> </tr> <tr> <td data-bbox="558 537 989 566">6</td> <td data-bbox="999 537 1465 566">600 - 699</td> </tr> <tr> <td data-bbox="558 574 989 604">7</td> <td data-bbox="999 574 1465 604">700 - 799</td> </tr> <tr> <td data-bbox="558 612 989 641">8</td> <td data-bbox="999 612 1465 641">800 - 899</td> </tr> <tr> <td data-bbox="558 649 989 678">9</td> <td data-bbox="999 649 1465 678">900 - 999</td> </tr> <tr> <td data-bbox="558 686 989 716">10</td> <td data-bbox="999 686 1465 716">1,000 - 1,099</td> </tr> <tr> <td data-bbox="558 724 989 753">11</td> <td data-bbox="999 724 1465 753">1,100 - 1,199</td> </tr> <tr> <td data-bbox="558 761 989 790">12</td> <td data-bbox="999 761 1465 790">1,200 & Over</td> </tr> </tbody> </table>	Months of Future Service Credit	Hours of Work in Covered Employment During Calendar Year	0	Less than 100	1	100 - 199	2	200 - 299	3	300 - 399	4	400 - 499	5	500 - 599	6	600 - 699	7	700 - 799	8	800 - 899	9	900 - 999	10	1,000 - 1,099	11	1,100 - 1,199	12	1,200 & Over

<p>Contribution Rate</p>	<p>Varies from \$0.05 to \$21.62 per hour as of the valuation date. The average rate is \$5.38 per hour as of January 1, 2018. 2.5% of employer contributions are allocated to 401(h) Medical Accounts but are subject to pension benefit accruals.</p>																												
<p>Required Contribution Increases</p>	<p>Contribution rate increases required under the Funding Improvement Plan Options are described below. <i>First Alternative Option:</i> 7.0% for 2017 Plan Year, none for 2018 <i>Second Alternative Option:</i> 3.5% for 2017 Plan Year, none for 2018</p>																												

Cost of Living Adjustment (COLA)

- *Eligibility:* Pensioners and beneficiaries whose benefits are based on contribution rates that were increased by the Required Pension Fund Increase and who separated and retired from Covered Employment on or after January 1, 1991 and before December 1, 2001. No payment is made after January 1, 2008 unless the annual supplement had been in effect 60 months before that date (i.e., the benefit must have been payable on the participant's Allocation Date for 2002 – October 31, 2002).
- *Amount:* An annual supplement equal to 2% of the participant's total monthly payments for the 12 months immediately preceding the Allocation Date, multiplied by the number of whole years preceding the Allocation Date that the participant or beneficiary has received benefits, up to a maximum of 15 years. If the participant had elected a level income option, the 2% factor is applied to the benefit prior to the adjustment for the form of payment.

Effective July 1, 1995, no NPF COLA Benefit is payable with respect to any benefits accrued after June 30, 1995.

A participant who was retired and received an annual supplemental increase under the NPF COLA Benefit for the 2002 Allocation Date will continue to receive the benefit, but it will not exceed the supplement that was paid for the 2002 Allocation Date (i.e., it remains fixed at that amount)

Changes in Plan Provisions

Contribution rates increased in accordance with the Funding Improvement Plan. Since benefit accruals are tied directly to contribution rates, the contribution rate increases are treated as a Plan change.

The average contribution rate increased from \$5.09 per hour as of January 1, 2017 to \$5.37 per hour as of January 1, 2018.
